Special Council Meeting Agenda  
November 28, 2022  
5:30 PM

Call to Order

Roll Call

1. 2023 City Budget Workshop
  - a. Presentation by Ted Marra, Project Manager WEFI, LLC
  - b. 2023 – 2028 City of Forks Capital Improvement Plan

**Note:**

Ted Marra, Project Manager, West End Forest Industries, LLC will share information on the New Mill Project.

**Mill Background:**

- Last March the Sustainable Green Team, LTD (SGTM) purchased the former Interfor Mill property in Beaver, WA just north of the City of Forks to start up the new West End Forest Industries, LLC (WEFI) mill. The new mill will be located at the former Interfor sites at the City of Forks' Industrial Park and the site in Beaver. The two sites will again work jointly to form the operations of the new mill.
- The production facility will produce a wide range of dimensional and specialty lumber products at the Beaver sawmill location where SGTM has installed, modern, highly optimized process machinery for the sawmill operations and is in the final stages of receiving their permits. Additionally, SGTM is planning for a state-of-the-art MASS engineered timber production at the Forks Industrial Park featuring a highly automated production utilizing environmentally friendly, formaldehyde free, Nano Adhesive Technology safeguarding workers, end-users and the environment.
- SGTM expects to source primarily Doug Fir and Hemlock from local landowners and the Department of Natural Resources for their WEFI mill. At full capacity, this mill will have a robust production capacity, with world-class productivity and lumber recovery, and a competitive product mix. In addition to selling lumber, the company plans to sell residual fiber products, including chips and sawdust, to local and international pulp and pellet plants.
